

Basic Skin Care by Escent Skin:

STEP 1 – CLEANSE Opalescent Cleansing Crème

DESCRIPTION: Opalescent Cleansing Crème is a moisturizer, rejuvenator, and toning agent all in one. This cleanser will leave your skin feeling soft and supple, with a new firmness to it. It contains a winning combination of Organic Aloe, Vitamin E, Sunflower Oil, Beeswax, Olive Oil, Avocado Oil, Kokum Butter and Jojoba oil for moisturizing, and active Toning Enzymes for firming.

DIRECTIONS: Morning and evening, scoop out a dime sized amount onto fingertips. Add warm water and rub hands together then apply gently to your face in circular motions going in upward-outward direction. Rinse off with warm water and soft cloth. Pat dry.

STEP 2 – TONE Anti-Aging Botanical Spray

DESCRIPTION: Botanical Anti-Aging Spritze exquisitely plumps, hydrates, brightens and repairs the look and feel of your skin.

Multi-fruit and Alpha Lipoic Acids firm and gently exfoliate for that anti-aging effect we want. Hyaluronic Acid holds 1000 times its weight in water for hydration and plumping. Vitamins Esther C and E, and Carrot Oil add protection and conditioning benefits.

The combination of Colloidal Silver, MSM and nano-structured water make a very effective system to deliver our proprietary anti-aging ingredients.

DIRECTIONS: One or two spritzes over face, neck and décolleté morning and evening will provide amazing results in a very short time. In addition to using in your daily cleansing routine, use this remarkable fluid to set your make-up, freshen up after work, as an after sun-treatment or anytime your face feels dry.

STEP 3 – TREAT Anti-Wrinkle Finishing Serum

DESCRIPTION: We spared no expense in the formulation of this exquisite serum. It plumps and hydrates with a high concentration of Hyaluronic Acid that retains and restores moisture while protecting the skin from environmental damage. The result is a diminished appearance of fine lines and wrinkles for that anti-aging effect we want. A lightening complex fades the appearance of dark spots while Alpha Hydroxy Fruit Acids regulate and facilitate cell turnover and renewal. Alpha Lipoic and Salicylic Acids are naturally occurring in our skin but decline as we age. We add them to aid in exfoliating and re-texturing. The end-result is plump, firm, radiant skin and you will never want to be without this serum.

DIRECTIONS: Apply one or two pumps to face, neck, and décolleté morning and evening to clean skin or while skin is still slightly damp from Botanical Anti-Aging Spritze if used. The anti-aging ingredients in the serum work synergistically together to prompt healthy, younger looking skin.

STEP 4 MOISTURIZE – Opalescent Daily Moisture & Opalescent Night Crème

MORNING: DESCRIPTION: Moisturize your face, neck and chest area morning and evening after you cleanse, tone and treat. Over 90% of the visible signs of aging in skin are the result of environmental, such as dryness and sun damage. Thick, rich, protection and with an Organic Herbal Infusion, Aloe Vera, Kosher Vegetable Glycerin, Vitamins A and E, Evening Primrose Oil and Allantoin for healing and smoothing. Glides on and leaves your face feeling soft and moist all day. Wonderfully clean Escent signature fragrance.

DIRECTIONS: Scoop out a nickel size portion and rub between your two palms to soften. Spread evenly to face, neck, and décolleté in the morning while skin is still slightly damp from Step 2.

EVENING: DESCRIPTION: Rich whipped butters, Pumpkin and Papaya extracts and Pomegranate enzymes provide light creamy hydration and soothing stimulation while you sleep. This Pumpkin and Papaya night crème has our light wonderfully clean signature fragrance.

Directions: Rub a dime-size portion between your finger tips. Pat evenly to face, neck, and décolleté in the evening while skin is still slightly damp from Step 3.
