

Basic Skin Care by Scent Skin:

TONE & TREAT Finishing Serum Fact Sheet

ANTI-WRINKLE FINISHING SERUM Plumps, Firms, Re-Textures

DESCRIPTION: We spared no expense in the formulation of this exquisite serum. It plumps and hydrates with a high concentration of Hyaluronic Acid that retains and restores moisture while protecting the skin from environmental damage. The result is a diminished appearance of fine lines and wrinkles for that anti-aging effect we want. A lightening complex fades the appearance of dark spots while Alpha Hydroxy Fruit Acids regulate and facilitate cell turnover and renewal. Alpha Lipoic and Salicylic Acids are naturally occurring in our skin but decline as we age. We add them to aid in exfoliating and re-texturing. The end-result is plump, firm, radiant skin. You will never want to be without this serum.

DIRECTIONS: Apply one or two pumps to face, neck, and décolleté morning and evening to clean skin or while skin is still slightly damp from Botanical Anti-Aging Spritze if used. The anti-aging ingredients in the serum work synergistically together to prompt healthy, younger looking skin.

FINISHING SERUM ACTIVE INGREDIENTS and BENEFITS:

ALOE VERA. Our organic aloe is a botanical moisturizer, skin protectant and humectant containing water, amino acids and carbohydrates. It is used topically as a moisturizer, stabilizer, and light tonic for the skin.

R-ALPHA LIPOIC ACID. R-Alpha Lipoic is “next generation” Lipoic Acid and a popular new ingredient for anti-aging properties. It helps to smooth fine lines in mature skin. It also accelerates the sloughing off dead skin and diminishing the signs of actinic keratosis (discoloration of the skin).

HYALURONIC ACID. Hyaluronic acid comes to the rescue with its unique ability to hold more than 1000 ml of water per gram of Hyaluronic acid, which is a key factor in allowing the skin to retain more water. Hyaluronic acid is naturally found in human tissue. Escent Skin only uses the vegetable based lab-created version for our products. Hyaluronic acid adjusts its moisture absorption based on the relative humidity in the air so it is the ideal ingredient in skin care products as it adjusts to the skin’s need. Hyaluronic acid also protects the epidermis by scavenging reactive oxygen species generated by ultra violet light that would normally cause sunspots.

MULTI-FRUIT GLYCOLIC ACIDS. Blend of Grape, Kiwi, Apple and Strawberry Fruit acids are an anti-aging, antioxidant ingredient that assists with skin cell renewal and cell shedding. This blend also works to dissolve the intercellular cement responsible for abnormal discoloration of the skin, improving skin hydration by enhanced moisture uptake.

GLYCOLIC ACID. Glycolic acid (alpha hydroxy acid) causes skin cell renewal and exfoliation (or shedding of the surface skin) and enhances moisture.

SALICYLIC ACID. Natural occurring Beta-hydroxy acid that is oxygenating and detoxifying, softens, is an anti-bacterial and helps eliminate clogged pores.

INGREDIENTS: Organic Herbal Infusion, Organic Aloe Barbadensis Leaf Juice (Aloe Vera), Hamamelis Virginiana (Witch Hazel), Hyaluronic Acid, R Lipoic Acid, Canola Oil, Retinyl Palmitate (Vitamin A), Tocopheryl (Vitamin E), Santalum Album (Sandalwood Distillate), Vitis Vinifera (Grape) Fruit Extract, Actinidia Chinensis (Kiwi) Fruit Extract, Pyrus Malus (Apple) Fruit Extract, Fragaria Vesca (Strawberry) Fruit Extract. (Glycolic Acids), Carbomer, (2s)-2-Amino-5-guanidinopentanoic Acid, Organic Salix Lucida (Salicylic Acid), Organic Simmondsia Chinensis (Jojoba Oil), Organic Centella Asiatica (Gotu Kola), Organic Camellia Sinensis (Green Tea), Organic Resina Propoli (Propolis), Ethylhexyl Glycerin, Phenoxyethanol.
