

# REVEALING SUPPORT by Escent Skin:

## SATIN REVEAL DUET FACT SHEET

**DID YOU KNOW?** By alternating peels, polishes and masques you can "reveal" fresh beautiful, bright, satiny skin without harm or damage to your skin? Escent Skin uses a carefully matched DUET combination to obtain the best possible results. Peels and Masques deep-clean and re-texture; and Polishes re-finish. It doesn't matter if you "reveal" in the morning or evening. The trick is to "reveal" regularly at the time of day that works best for you and allow at least one day of rest between. Think of it as your personal "spoil myself" time.

### SATIN & CREAM ENZYME PEEL

**DESCRIPTION:** Active organic enzymes make this botanical masque a powerful tool for tuning back the clock. Enzymes gently scavenge damaged, diseased, and dead skin cells in order to make room for new skin tissue and collagen to fill in the skin's upper dermal layer for optimal radiance. Gotu Kola is a proven collagen stimulant proven to work 120 times more effectively than synthetic collagen replacement therapies. Reishi mushroom carries Asiatic Acid to the cells for damage restoration, fading of sunspots and damage, wrinkle reduction, and boosting of cellular hydration. Effectively used twice a week to daily use depending on skin types. Helps to clear clogged pores, minimizes skin eruptions, and fights the march of time across your face with gentle and effective clinically proven skin rejuvenating factors.

**DIRECTIONS:** Apply a thin film to clean damp face, neck and décolleté, being careful to avoid the eye area completely. Only use products made especially for that delicate and sensitive area. Leave this peel on for about 10-15 minutes. Wash off with warm water and face cloth. Pat Dry. Follow immediately with Bio-Directed Living Water Spritze (Tone Step), Treat and Protect Steps. Note: if you are using a variety of peels and masques, alternate them so that you are not exfoliating more than 2 times a week.
